

## RIVERVIEW VISION CENTER

As a courtesy to our patients, we do bill insurance providers. Medicare and some other insurance providers will not cover a routine eye examination. If there is something medically wrong with your eyes, we can bill a comprehensive medical examination to these insurance providers. The charge for a comprehensive medical examination of the eyes is greater than the charge for a routine eye exam. If you have not met your deductible on your insurance, you will be responsible for the amount billed to your insurance provider, which will likely exceed the \$85.00 charge for a routine exam.
